

WHAT IS CLAIMED IS:

- 1 1. Motorcycle luggage for removable attachment to a
2 sissy bar of a motorcycle, said luggage comprising:
3 an enclosure having a front, a back, a top, a
4 bottom, and opposing lateral side walls; and
5 an adjustable pocket affixed to said front of
6 said enclosure, said adjustable pocket expandable from
7 a closed position to an open position, said adjustable
8 pocket being configurable to securely accommodate the
9 sissy bar.
- 1 2. The motorcycle luggage of Claim 1, wherein said
2 adjustable pocket comprises at least one fastening
3 mechanism, permitting said adjustable pocket to be
4 expanded from said closed position to said open
5 position and collapsed from said open position to said
6 closed position.
- 1 3. The motorcycle luggage of Claim 2, wherein said
2 fastening mechanism comprises at least one zipper.
- 1 4. The motorcycle luggage of Claim 1, wherein said
2 adjustable pocket further comprises at least one
3 adjustable strap attached to said pocket for securely
4 tightening said pocket around the sissy bar.
- 1 5. The motorcycle luggage of Claim 1, wherein said
2 pocket has a top edge affixed to said front of said
3 enclosure, a bottom edge and opposing lateral side
4 edges, each of said lateral side edges expandably
5 secured to said front of said enclosure with a
6 fastening mechanism for adapting said pocket to
7 tightly secure the sissy bar.

1 6. The motorcycle luggage of Claim 1, further
2 comprising quick release straps attached to said
3 enclosure and adapted to engage the motorcycle.

1 7. The motorcycle luggage of Claim 1, further
2 comprising at least one wheel rotatably secured to one
3 of said bottom, said front and said back of said
4 enclosure to facilitate movement of said luggage.

1 8. The motorcycle luggage of Claim 1, further
2 comprising a handle attached to one of said top, said
3 front and said back of said enclosure.

1 9. The motorcycle luggage of Claim 8, wherein said
2 top of said enclosure includes a handle seat formed
3 therein, and wherein said handle is attached to said
4 top of said enclosure, said handle movable between a
5 retracted position wherein said handle rests within
6 said handle seat, and an expanded position wherein a
7 portion of said handle projects from said handle seat.

1 10. The motorcycle luggage of Claim 1, further
2 comprising at least one storage compartment.

1 11. The motorcycle luggage of Claim 10, further
2 comprising a rain cover disposed within said storage
3 compartment.

1 12. A motorcycle travel bag comprising:
2 an enclosure having an interior storage
3 compartment and an exterior surface; and
4 an expandable pocket mounted to said exterior
5 surface of said enclosure, said pocket including
6 front, back, side, and bottom sections defining a
7 cavity for accommodating aissy bar of a motorcycle,
8 said cavity having a variable capacity and an
9 adjustment mechanism for varying the capacity of said

10 cavity to tightly secure the sissy bar within said
11 pocket.

1 13. The travel bag of Claim 12, wherein said
2 adjustment mechanism includes at least one zipper.

1 14. The travel bag of Claim 12, wherein said
2 expandable pocket further comprises at least one
3 adjustable strap attached to said pocket.

1 15. The travel bag of Claim 12, further comprising at
2 least one handle mounted to said enclosure.

1 16. The travel bag of Claim 15, wherein said handle
2 is an extendable handle having a retracted position
3 and an extended position.

1 17. The travel bag of Claim 12, further comprising at
2 least one wheel rotatably mounted to said enclosure.

1 18. A motorcycle bag configured to removably mount to
2 motorcycle seat backs of different dimensions, said
3 bag comprising:

4 an enclosure having an exterior surface and an
5 interior compartment for storing items;

6 an expandable receptacle affixed to said exterior
7 surface of said enclosure, said expandable receptacle
8 comprising cavity having a variable capacity and a
9 closure mechanism for varying said capacity; and

10 at least one strap attached to said enclosure,
11 said strap including a fastening mechanism.

1 19. The bag of Claim 18, wherein said expandable
2 receptacle is a pocket.

1 20. The bag of Claim 18, wherein said closure
2 mechanism includes at least one zipper.

1 21. The bag of Claim 18, further comprising at least
2 one wheel rotatably mounted to said enclosure.

1 22. The bag of Claim 18, further comprising a rain
2 cover attached to said enclosure.

1 23. Motorcycle luggage configured to removably mount
2 to motorcycle seat backs of different dimensions, said
3 luggage comprising:

4 a bag having an exterior surface and a storage
5 compartment therewithin; and

6 a variable luggage mounting system integrally
7 secured to said exterior surface of said bag, said
8 luggage mounting system including an expandable pocket
9 having a collapsed configuration and an expanded
10 configuration, said pocket comprising a closure
11 mechanism for allowing said pocket to be expanded from
12 its collapsed configuration to its expanded
13 configuration and to at least one intermediate
14 configuration between its collapsed configuration and
15 its expanded configuration.

1 24. The motorcycle luggage as defined in Claim 23,
2 wherein said pocket has a top edge affixed to said
3 exterior surface of said bag, a bottom edge and
4 opposing lateral side edges, each of said lateral side
5 edges expandably secured to said exterior surface of
6 said bag with a fastening mechanism for adapting said
7 pocket to tightly secure a seat back of a motorcycle.
